

Sangavi C

Software Engineer – AI & Full-Stack Development

sangavikavic@gmail.com | +91-7010846735 | Bengaluru, India
linkedin.com/in/sangavi-c | github.com/sangavikavi | Portfolio

Summary

Software Development Engineer with 2+ years of experience building production-grade AI applications and full-stack solutions. Skilled in Agentic AI, multi-agent systems, LLM integration, workflow automation, and scalable application development using Python, React, Angular, LangChain, and LangGraph.

Technical Skills

Languages	Python, JavaScript, TypeScript, SQL, NoSQL
Agentic AI	LangChain, LangGraph, Google ADK, Multi-Agent Development, LLM Integration, Prompt Engineering, RAG, Model Evaluation, Human-in-the-Loop (HITL), ADLC
Backend	FastAPI, REST APIs, GraphQL, PostgreSQL, Distributed Systems, Kafka
Frontend	React, Angular, TypeScript
Cloud & Dev Tools	Docker, Git, GitHub Copilot, Claude Code, GCP, AWS, CI/CD
Software Engineering	Workflow Automation, System Design, Unit Testing, Debugging, Code Reviews, Agile / Scrum

Experience

Software Development Engineer (AI) – HashedIn by Deloitte Sept 2024 – Present
Bengaluru, India

- Designed and developed an **Agentic AI platform** using Google ADK to automate regulatory intelligence, compliance assessment, risk analysis, and impact evaluation, **reducing manual effort by 95%**.
- Built specialized AI agents for regulatory discovery and compliance analysis, along with a dedicated **QA Agent** that validated AI-generated responses, improving output accuracy and consistency.
- Developed an **Agentic Vendor Management** platform that automated vendor invoice reviews, expense submissions, approvals, BambooHR timesheets, trip planning, and reimbursement workflows using AI agents with human-in-the-loop validation.
- Architected a distributed **multi-agent collaboration framework** where Project Management, Sales, and Cloud Engineering agents coordinated tasks using **Kafka** as the communication layer and an **Agent Registry** for dynamic agent discovery.
- Developed scalable backend services using **Python, FastAPI, PostgreSQL, REST APIs, and GraphQL**, and built responsive enterprise applications using **React** and **Angular**.
- Collaborated with cross-functional teams throughout the software development lifecycle, leveraging GitHub Copilot and Claude Code to accelerate delivery while maintaining code quality through testing, debugging, and code reviews.

Trainee Software Engineer – HashedIn by Deloitte June 2024 – Sept 2024
Bengaluru, India

- Developed enterprise applications using **Java** and **Angular**, contributing to feature implementation, debugging, unit testing, and production support in Agile teams.
- Built reusable UI components and integrated backend APIs while supporting cloud-native GenAI application development on GCP.

Projects

- Multi-Agent Software Engineering Platform** – Built autonomous planner, developer, reviewer, and testing agents that collaboratively analyzed repositories, generated code changes, executed tests, and created pull requests with human approval, reducing development effort by **60%**. *(Python, LangGraph, FastAPI, React, PostgreSQL, pgvector, Docker)*
- AI Agent Observability Platform** – Developed a full-stack observability platform for monitoring multi-agent workflows with real-time execution tracing, prompt versioning, token usage, workflow replay, and agent evaluation to simplify debugging of production AI systems. *(Python, FastAPI, React, LangGraph, Kafka, PostgreSQL, WebSockets)*

Certifications & Awards

- Google Cloud Certified – Professional Cloud Architect
- Build with Vertex AI – Technical Expert
- Claude Certified Architect – Foundations
- Excellence Award (3x) for outstanding delivery, HashedIn by Deloitte

Education

B.E., Computer Science and Engineering 2020 – 2024
V.S.B Engineering College, Karur Percentage: 87%
Relevant coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning.
